

Activity: Fixing Closure Loop

[Submit Assignment](#)**Due** Sunday by 11:59pm**Points** 10**Submitting** a text entry box

Do the activity in the [Scope and Context](http://classes.engr.oregonstate.edu/eecs/fall2015/cs290-400/content/core-content/js-functions-objects/js-scope-context.html) [\(http://classes.engr.oregonstate.edu/eecs/fall2015/cs290-400/content/core-content/js-functions-objects/js-scope-context.html\)](http://classes.engr.oregonstate.edu/eecs/fall2015/cs290-400/content/core-content/js-functions-objects/js-scope-context.html) section. You need to fix bug with a loop and closures. Note you need to add a line that actually calls testList(); because there is no button like on the site to execute the code.

This is a pass/fail assignment based on submitting some code that looks like you gave it a good shot. Note that if your code is identical to example 5, you won't get points for it.

Some Rubric (5)			
Criteria	Ratings		Pts
Student add reasonable changes to the function buildList(list)	10.0 pts Full Marks	0.0 pts No Marks <i>The code is exactly the same as the original wrong code.</i>	10.0 pts
			Total Points: 10.0
